

LogLogic® Log Management Infrastructure

LMI Basic Education

This independent-study online only course is designed to give operators a first look at searching, alerting and reporting using their LogLogic LX, MX or ST appliances. Students will learn the fundamentals of moving around the appliance, searching using the real-time viewer or Indexed data, reporting using Agile or Summary reports, and Alert management.

Prerequisites

Persons attending this course should have a basic knowledge of internet concepts, and a working understanding of internet protocols and addressing. Fundamental knowledge of UNIX is recommended.

Who Should Attend

Persons who are responsible for the operation of LogLogic solutions should attend this course.

- IT log management personnel
- System and IT administrators
- Sales engineers
- Reseller support engineers

LMI Basic Course Includes:

- Introduction to LogLogic
- LogLogic Products
- LogLogic Basic Concepts
- Indexing and Index Reporting
- Agile Reporting
- Summary Reporting
